"A historical classic" that brings Mao Tse-tung, the Long March, and the Chinese revolution to vivid life (Foreign Affairs). Journalist Edgar Snow was the first Westerner to meet Mao Tse-tung and the Chinese Communist leaders in 1936—and out of his up-close experience came this historical account, one of the most important books about the remarkable events that would shape not only the future of Asia, but also the future of the world. This edition of Red Star Over China includes extensive notes on military and political developments in the country; interviews with Mao himself; a chronology covering 125 years of Chinese history; and nearly a hundred detailed biographies of the men and women who were instrumental in making China what it is today.

Two associate professors of strategy at the Naval War College assess how the rise of Chinese sea power will affect the United States maritime strategy in Asia and discuss the sea-power theories of Alfred Thayer Mahan, now popular in China.

The first Westerner to meet Mao Tse-tung and the Chinese Communist leaders in 1936, Edgar Snow came away with an authorized account of Mao's life, as well as a history of the famous Long March and the men and women who were responsible for the Chinese revolution. Out of that experience came this book--a classic work about the birth of the Communist movement in China.

Biographies praising Mao and those slandering him are all based on the American journalist Edgar Snow's account in *Red Star over China* for the route Mao traveled from early childhood through his youth. This book examines the image of Mao and the biographical information made known to the world through the publication of Snow's book.

Route 312 is the Chinese Route 66. It flows three thousand miles from east to west, passing through the factory towns of the coastal areas, through the rural heart of China, then up into the Gobi Desert, where it merges with the Old Silk Road. The highway witnesses every part of the social and economic revolution that is turning China upside down. In this utterly surprising and deeply personal book, acclaimed National Public Radio reporter Rob Gifford, a fluent Mandarin speaker, takes the dramatic journey along Route 312 from its start in the boomtown of Shanghai to its end on the border with Kazakhstan. Gifford reveals the rich mosaic of modern Chinese life in all its contradictions, as he poses the crucial questions that all of us are asking about China: Will it really be the next global superpower? Is it as solid and as powerful as it looks from the outside? And who are the ordinary Chinese people, to whom the twenty-first century is supposed to belong? Gifford is not alone on his journey. The largest migration in human history is taking place along highways such as Route 312, as tens of millions of people leave their homes in search of work. He sees signs of the booming urban economy everywhere, but he also uncovers many of the country's frailties, and some of the deep-seated problems that could derail China's rise. The whole compelling adventure is told through the cast of colorful characters Gifford meets: garrulous talk-show hosts and ambitious yuppies, impoverished peasants and tragic prostitutes, cell-phone salesmen, AIDS patients, and Tibetan monks. He rides with members of a Shanghai jeep club, hitchhikes across the Gobi desert, and sings karaoke with migrant workers at truck stops along the way. As he recounts his travels along Route 312, Rob Gifford gives a face to what has historically, for Westerners, been a faceless country and breathes life into a nation that is so often reduced to economic statistics. Finally, he sounds a warning that all is not well in the Chinese heartlands, that serious problems lie ahead, and that the future of the West has become inextricably linked with the fate of 1.3 billion Chinese people. "Informative, delightful, and powerfully moving . . . Rob Gifford's acute powers of observation, his sense of humor and adventure, and his determination to explore the wrenching dilemmas of China's explosive development open readers' eyes and reward their minds." — Robert A. Kapp, president, U.S.-China Business Council, 1994-2004

When *MAO'S CHINA* first appeared in 1977, it was hailed as the single most useful general volume on recent Chinese history, covering every important question of the time with clarity and amazing insight. Now, Meisner brings the third edition of his definitive work, with new information provided throughout the classic study. Including a whole new section in Part Six, 'Deng Xiaoping and the Origins of Chinese Capitalism: 1976-1998', Meisner assesses the country's uneasy relationship with democracy, socialism and capitalism. Retaining the elegance, lucidity and comprehensiveness he is known for, Meisner moves far beyond his previous work to paint a never-before-seen portrait of the political and social realities of China on the brink of the new Millennium, and the global implications of its rise to economic and political power.

The Red Star and the Crescent provides an in-depth and multi-disciplinary analysis of the evolving relationship between China and the Middle East. Despite its increasing importance, very few studies have examined this dynamic, deepening, and multi-faceted nexus. James Reardon-Anderson has sought to fill this critical gap. The volume examines the "big picture" of international relations, then zooms in on case studies and probes the underlying domestic factors on each side. Reardon-Anderson tackles topics as diverse as China's security strategy in the Middle East, its military relations with the states of the region, its role in the Iran nuclear negotiations, the Uyghur question, and the significance and consequences of the Silk Road strategy. A comprehensive study of the changing forces driving one of the world's most important strategic, economic and cultural relationships

If you would like a more detailed description of the book, please see the "Table of Contents" section, where there is a short summary of each chapter

CONVERSATIONAL DESCRIPTION: This is a book by an Oxford professor that's been a long time in the making—it's been under contract for ten years—and that we're very excited about and have a deep investment in. It's a big, sweeping, incredibly ambitious book of history that tells the whole story of communism from its origins in the French Revolution with Rousseau and Robespierre all the way up to today in China and Cuba and North Korea and everything in between. We're going to publish it in November, which is the 20th anniversary of the Berlin Wall coming down, which should give us a good news peg in terms of publicity and reviews. This book has a lot of things going for it but the biggest are probably the way it has a totally epic sweep from the 1700s onward, and its incredible cast of characters, and the way that it gives you the intellectual history of the movement—the ideological stuff—along with the narrative of what literally happened over hundreds of years—the power struggles, the back-room stuff, the infighting—and the way that Communism affected the big picture of world history. It is reminiscent of Niall Ferguson's new book *The Ascent of Money* as well as our book *A Splendid Exchange* because like those books this is history on a very large canvas that weaves together a lot of different threads—the ideas, the politics, the economics, the military stuff, the cultural stuff—into a compelling narrative. It's also similar to Laurence Wright's recent book *The Looming Tower*, which gave you the intellectual roots of Al Qaeda at the same time as it was giving you this amazing human story of what actually happened. The author has done staggering research over the course of a decade and just puts the story together brilliantly. He brings to life Marx and Engels, who are working the intellectual angle with *The Communist Manifesto* and laying the foundation for Lenin and Stalin who come along to put the ideas into practice. But one thing to emphasize here is that this is not just the story of Soviet Communism. This is the whole story. You get Ho Chi Minh in North Vietnam, you get Mao and Deng Xiaoping in China, you get Castro and Che in Cuba, Tito in Yugoslavia, and dozens of others around the world. Obviously you also get Khrushchev and Kennedy and Gorbachev and Reagan and all that, but it's important to realize that it isn't just the Soviets. What you come away with is this complete understanding of a new piece of the puzzle of humanity's ongoing struggle to govern itself and organize society and figure out how to live in the best way possible. You get the sense that Communism as it was envisioned in the early days—as a pure idea—probably wasn't any worse than Capitalism, it's just the old story of people getting involved and screwing things up with their egos and greed and hubris and insecurities—that's another similarity with *The Looming Tower*, where you saw how humiliation at the hands of the West drove so much of Al Qaeda's ideology. In the case of Communism, there was insecurity in these countries that the West saw them as "backward" and a lot of the terrible stuff that happened came out of a desire to prove that they weren't. The author is a very highly regarded Oxford professor and we're going to deliver some big blurbs on this. We don't have them yet because the author just delivered but if you look at what we've done lately in terms of blurbage with these big history books, it will be similar. In terms of reviews, there's never any guarantee that we'll get them but I think we have a much better shot than we did with *Old World New World*, where we didn't have any kind of news peg, but with this book we will in the 20th anniversary of the Berlin Wall coming down.

MORE FORMAL DESCRIPTIVE COPY: Communism was one of the most powerful political and intellectual movements the world has ever seen. At the height of their influence, Communists

Online Library Red Star Over China The Clic Account Of Birth Chinese Communism Edgar Snow

controlled more than a third of the earth's surface. But perhaps more astonishing than its rapid rise and extraordinary reach was Communism's sudden, devastating collapse in November of 1989. In *The Red Flag*, Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years, from its birth after the French Revolution to its ideological maturity in nineteenth-century Germany to its rise to dominance (and subsequent fall) in the twentieth century. Beginning with the first modern Communists in the age of Robespierre, Priestland examines the motives of thinkers and leaders including Marx, Engels, Lenin, Stalin, Castro, Che Guevara, Mao, Ho Chi Minh, Gorbachev, and many others. He also asks what it was about Communism that inspired its rank and file—whether the militants of 1920s Russia, the guerrilla fighters of China, or the students of Ethiopia—and explores the experience of what it meant to live under Communism for its millions of subjects. He shows how Communism, in all its varieties, appealed to different societies for different reasons, in some as a response to inequalities and in others more out of a desire to catch up with the West. But paradoxically, while destroying one web of inequality, Communist leaders were simultaneously weaving another. It was this dynamic, together with widespread economic failure and an escalating loss of faith in the system, that ultimately destroyed Soviet Communism itself. At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy, *The Red Flag* is essential reading if we are to apply the lessons of the past to navigating the future.

'Like the brilliant sun, the October Revolution shone over all five continents, awakening millions of oppressed and exploited people around the world. There has never existed such a revolution of such significance and scale in the history of humanity'. - Ho Chi Minh// From Cuba to Vietnam, from China to South Africa, the October Revolution remains as an inspiration. After all, that Revolution proved that the working class and the peasantry could not only overthrow an autocratic government but that it could form its own government, in its image. It proved decisively that the working class and the peasantry could be allied. It proved as well the necessity of a vanguard party that was open to spontaneous currents of unrest, but which could guide a revolution to completion. This book explains the power of the October Revolution for the Third World. It is not a comprehensive study, but a small book with a large hope - that a new generation will come to see the importance of this revolution for the working class and peasantry in that part of the world that suffered under the heel of colonial domination.
